## Customer by the Design Team of Accenture Interactive NL JOURNE

| 1 Phases  High-level steps your user needs to accomplish from start to finish | System Configuration                   | Web Application                            | Uploading Gesture<br>Images               | Performing tasks according to the trained data |
|---|--|--|---|--|
| 2 Steps  Detailed actions your user has to perform                            | Check for device configuration         | Smooth Communication for disabled people   | Train the dataset images in a model       | Add voice<br>based on the<br>trained data.     |
| 3 Feelings What your user might be thinking and feeling at the moment         | Device verified with configuration     | Easy to use                                | Trained data loaded into the model        | Embedding with Voice using NLP                 |
|   | Improper configuration leads in error. | Complex design may cause difficulty to use | Mismatched data may reduce the efficiency | Without using NLP. Voice cannot be generated.  |
